app/views/posts/show.html.erb

Code for displaying a post

Code for displaying comments associated with the post

Form for creating a new comment

Links

Summary:

- 1 Identify the pieces of the page you want to dynamically load using Ajax. (`show.html.erb`)
- 2 Create partial templates for the pieces of the page you want to load dynamically. (`_comments.html.erb`)
- 3 Modify the form so that it uses Ajax. (`show.html.erb`, `remote: true`)
- 4 Modify the controller so that it can respond to a Ajax request. (`comments_controller.rb`, `respond_to format.js`)
- 5 Create the JavaScript code that will be returned and dynamically and executed in the web page. (`create.js.erb`)
